I was able to get it from Wisconsin. I'll convert to a GIS layer.

The document by I.D. Lippelt that includes the water table map can be obtained from the Library of Congress here (second listed document):

<https://www.loc.gov/maps/?fa=contributor%3Awisconsin+geological+and+natural+history+survey%7Csubject%3Awisconsin%7Ccontributor%3Alippelt%2C+i.+d.&all=true>

But the site requires that you establish an account to check out the document.

Karen,

I didn't see your email responses when I stopped by to tell you Cheryl wanted to go ahead and request the map from the Library of Congress. Thank you for finding the alternative web link to obtain the map. Cheryl, I'll defer to you if obtaining the map from the University of Wisconsin is sufficient for your needs. I'd

recommend that at least it will do for now for the upcoming meeting with the attorney, and if the attorney wants the map showing that it came from the L of C, he could decide that then.

Cheryl, please let Karen know if she needs to go forward with the L of C map copy, or if downloading from UW will work for your purposes.

Karen,

Curious, does your position as librarian mean that you have an account established for checking things out from the Library of Congress? I am not necessarily the requestor, it would be either Cheryl Burdett of Water Division, or Chuck Mikalian of Office of Regional Counsel. But I'll be meeting with them later this morning.
